

Tangram Directions page 1 of 2

- 1** Begin by folding corner 1 to meet corner 3. Fold the paper to create a crease along the diagonal, and then cut the square in half along the diagonal fold to create two pieces, A and B.

- 2** Take piece A and fold it in half as shown below. Then cut it in half along the crease to create two congruent right triangles. Set these triangles aside.

- 3** Take piece B, and fold it in half vertically as shown below to form a crease. Then unfold piece B. Caution: Do not cut this piece.

- 4** Then fold the vertex down to meet the center point on the base. Unfold, and then cut piece B into 2 pieces: a triangle and a trapezoid. Set the triangle aside.
